Installation of emergency vehicle equipment must be completed before final delivery of the vehicle, and coordinated by the awarded Ford Dealer and their up-fitter.

Installation shall be completed by an emergency vehicle up-fitter with an established reputation for emergency vehicle installation and modification of at least 10 years, shall be a registered NYS repair facility, shall be a factory direct dealer for all equipment required, third party suppliers will not be accepted. The installation of all emergency aftermarket equipment shall be installed by technician[s] holding an Emergency Vehicle Technician certification in a minimum of Law Enforcement Vehicles. Up-fitter shall have a comprehensive facility within two-hundred [200] miles of the Menands Police Department and shall have a lot which shall be completely fenced in and secured.

Awarded vendor shall be required to submit any and all documentation at the request of the Menands Police department supporting the aforementioned requirements are met. Emergency equipment up-fitter shall allow the Menands Police Department to do site visits, and shall upon delivery of the completed vehicle offer at a minimum one [1] training day and an installation warranty which shall be at a minimum five [5] years or 100,000 miles, which ever shall come first. Awarded dealer and or up-fitter shall be responsible for handling equipment warranty claims.

The Menands Police Department, with regard to equipment quality, warranty and officer safety have made a conscious decision to specify the equipment listed, and as such will not accept any substitutions or alterations.
